Introduction

Reimagine, reinforce, redefine

The Cisco Catalyst™ 9500 Series, including the Catalyst 9500X models, continues to shape the future with continued innovation that helps you reimagine connections, reinforce security and redefine the experience for your hybrid workforce big and small.

Cisco Catalyst 9500 Series Switches, based on the Cisco® Unified Access Data Plane (UADP) application-specific integrated circuit (ASIC), are Cisco's lead fixed enterprise core and aggregation switching platform and, as part of the Catalyst 9000 family, are built to transform your network to handle a hybrid world where the workplace is anywhere, endpoints could be anything, and applications are hosted all over the place.

The Cisco Catalyst 9500X switches, based on the Cisco Silicon One™ Q200 ASIC, are purpose built for the next-generation core, with a programmable pipeline (P4), and are the first network silicon to offer switching capacity up to 12.8-Tbps full duplex in the enterprise. The Q200 ASIC offers high performance along with full routing and switching capabilities without external memories. This is enabled by an internal architecture that includes an on-chip High-Bandwidth Memory (HBM). The Catalyst 9500X switches leverage a high-performance multiple-core x86 CPU and are Cisco's leading purpose-built fixed core and edge services enterprise switching platform, built for security, IoT, and cloud.

The Cisco Catalyst 9500X switches are the industry's first purpose-built fixed 10, 25, 50, 40, 100, 200, and 400 Gigabit Ethernet switches targeted for the enterprise campus. The Catalyst 9500X switches deliver unmatched forwarding scale (MAC addresses, IP unicast and multicast routes, Multiprotocol Label Switching [MPLS] labels) and deep buffering for enterprise applications. The Catalyst 9500X models include nonblocking 50 Gigabit Ethernet Small Form-Factor Pluggable (SFP-56) and nonblocking 400 Gigabit Ethernet Quad SFP Double Density (QSFP-DD) ports.

Catalyst 9500 Series switches support advanced routing and infrastructure services (such as MPLS Layer 2 and Layer 3 VPNs, Multicast VPN [MVPN], and Network Address Translation [NAT]); Cisco Software-Defined Access capabilities (such as a host tracking database, cross-domain connectivity, and VPN Routing and Forwarding [VRF]-aware Locator/ID Separation Protocol [LISP]); and network system virtualization with Cisco StackWise® Virtual technology that are critical for their placement in the campus core. The 9500 Series also supports foundational high-availability capabilities such as patching, Cisco Nonstop Forwarding with Stateful Switchover (NSF/SSO), redundant Platinum-rated power supplies, and fans, while supporting a wide array of optics. The switches provide an operational choice of Cisco Catalyst Center or Cisco Meraki® cloud monitoring.

The foundation of Software-Defined Access

The enterprise network lies at the heart of digital transformation. A network that is open, programmable, integrated, and secure maximizes business agility, allowing new business opportunities to be pursued and captured.

The Cisco Networking Cloud with Software-Defined Access (SD-Access) is the network fabric that powers business. Cisco SD-Access is an open and extensible, software-driven architecture that accelerates and simplifies your enterprise network operations. SD-Access enables policy-based automation from edge to cloud with foundational capabilities.

Cloud Ethernet Virtual Private Network (EVPN) fabric capabilities are supported for high-performance Cisco Catalyst 9500 models being managed from the Meraki dashboard. Learn more about cloud management and cloud fabric here.

Product overview

Cisco Catalyst 9500X models

- The Cisco Silicon One Q200 ASIC is purpose built for the next-generation network core plus edge switch. It is the first enterprise ASIC to offer speeds up to 12.8 Tbps full duplex with 8 Bpps of forwarding performance, while supporting high performance and full routing and switching capabilities without external memories.
- The Cisco Silicon One Q200 ASIC is built on 7nm fabrication technology, capable of high performance while maintaining a low power footprint.
- Up to 12.8 (switching ASIC capacity) Tbps switching capacity with 8 Bpps forwarding rate.
- 80 MB of dedicated low-latency buffer, with up to 8 GB of HBM buffer for deep packet buffers.
- Up to 28 native nonblocking 40/100 Gigabit Ethernet QSFP28 ports.
- Up to 60 native nonblocking 10/25/50 Gigabit Ethernet SFP56 ports.
- Up to 8 native nonblocking 40/100/200/400 Gigabit Ethernet QSFPDD ports.
- Intel 2.3-GHz x86 CPU with 8 cores and 32 GB of DDR4 memory.
- Up to 960 GB of SSD local storage for container-based application hosting (2x 10G KR ports).
- Flexible routing (IPv4, IPv6, and multicast) tables, Layer 2 tables, Access Control List (ACL) tables, and Quality-of-Service (QoS) tables.
- ASIC tables for switching scale up to 256,000 MAC addresses and routing scale up to 2 million routes.
- Dual-stack IPv4/IPv6 and dynamic hardware forwarding table allocations, for ease of IPv4-to-IPv6 migration.
- Hardware support for application hosting.
- Hardware support for line-rate 256-bit 802.1ae MACsec and WAN-MACsec data encryption.
- Cisco StackWise Virtual technology, a network system virtualization technology that increases operational efficiency and boosts nonstop communications and scaled system bandwidth. Multichassis EtherChannel can be configured across StackWise Virtual members for high resiliency.
- Platinum-rated (90% efficient) 1500-watt AC and/or DC power supplies.
- Field-replaceable, N+1 redundant fan-tray units, with added flexibility to choose the direction of airflow.

Cisco Catalyst 9500 models

- The Cisco UADP ASIC is ready for next-generation technologies with its programmable pipeline, microengine capabilities, and template-based, configurable allocation of Layer 2 and Layer 3 forwarding, ACLs, and QoS entries.
- Up to 6.4-Tbps switching capacity with up to 2 Bpps of forwarding performance.
- Up to 36 MB of unified buffer per ASIC.
- Intel® 2.4-GHz x86 CPU with up to 120 GB of USB 3.0 or up to 960 GB of SATA SSD storage for container-based application hosting.
- Up to 32 nonblocking 100 Gigabit Ethernet QSFP28 ports.
- Up to 32 nonblocking 40 Gigabit Ethernet QSFP+ ports.
- Up to 48 nonblocking 25 Gigabit Ethernet SFP28 ports.
- Up to 48 nonblocking 10 Gigabit Ethernet SFP+ ports.
- Scalable Layer 3 routing (IPv4, IPv6, and multicast) tables and Layer 2 switching tables.
- Hardware support for application hosting.
- IEEE 802.1ba Audio Video Bridging (AVB) built in to provide a better AV experience through improved time synchronization and QoS.
- Precision Time Protocol (PTP; IEEE 1588v2) provides accurate clock synchronization with sub-microsecond accuracy, making it suitable for distribution and synchronization of time and frequency over the network.
- Support for both static and dynamic NAT and Port Address Translation (PAT).
- Cisco StackWise Virtual technology, a network system virtualization technology that increases operational efficiency and boosts nonstop communications and scaled system bandwidth. Multichassis EtherChannel can be configured across StackWise Virtual members for high resiliency.
- Platinum-rated (greater than 90% efficient) AC and/or DC power supplies.
- Field-replaceable fan-tray units.
- Meraki cloud monitoring option.

Cisco IOS XE

This modern operating system for the enterprise provides support for model-driven programmability, on-box Python scripting, streaming telemetry, container-based application hosting, and patching for critical bug fixes. Cisco IOS® XE also has built-in defenses to protect against runtime attacks.

- **Simplified Campus Automation** is designed to optimize the discovery and configuration of devices in your network with a more streamlined simple and easy-to-use automation tool. With features such as simplified discovery, IT can discover devices within the network within just a few steps. Also available is a more streamlined GUI that provides a simplified view of switch configurations and software details on a port-by-port basis.
- **Cisco Plug and Play (PnP) enabled:** A simple, secure, unified, and integrated offering to ease new branch or campus device rollouts or updates to an existing network.
- **Automated device provisioning:** This is the ability to automate the process of upgrading software images and installing configuration files on Cisco Catalyst switches when they are being deployed in the network for the first time. Cisco provides both turnkey solutions such as PnP and off-the-shelf tools such as Zero-Touch Provisioning (ZTP) and Preboot Execution Environment (PXE) that enable an effortless and automated deployment.
- **API-driven configuration:** Modern network switches such as the Cisco Catalyst 9500 Series support a wide range of automation features and provide robust open APIs over NETCONF, RESTCONF, and gNMI using YANG data models for external tools, both off-the-shelf and custom built, to automatically provision network resources.
- **Granular visibility:** Model-driven telemetry provides a mechanism to stream data from a switch to a destination. The data to be streamed is driven through subscription to a data set in a YANG model. The subscribed data set is streamed out to the destination at configured intervals. Additionally, Cisco IOS XE enables the push model, which provides near-real-time monitoring of the network, leading to quick detection and rectification of failures.
- **Seamless software upgrades and patching:** To enhance OS resilience, Cisco IOS XE supports patching, which provides fixes for critical bugs and security vulnerabilities between regular maintenance releases. This support allows customers to add patches without having to wait for the next maintenance release.
- **Cloud management:** The Catalyst 9500 support cloud management with IOS XE. Cloud management provides the ability to view Catalyst 9500 Series switch statistics, manage configurations, and access troubleshooting capabilities directly from the Meraki dashboard. Learn more about cloud management.
- **WebUI:** Embedded GUI-based device-management tool that provides the ability to provision the device, simplifying device deployment and manageability and enhancing the user experience. WebUI comes with the default image. There is no need to enable anything or install any license on the device. You can use WebUI to build a day-1 configuration and from then on monitor and troubleshoot the device without having to know how to use the CLI.

Platform benefits

Table 1. Platform benefits

Model	Catalyst 9500	Catalyst 9500X
Resiliency and high availability		
Software Maintenance Upgrade (SMU)	Yes	Yes
Cisco StackWise Virtual	Yes	Yes[3]
Stateful Switchover (SSO)	Yes (StackWise Virtual Link)	Yes (StackWise Virtual Link)[3]
In-Service Software Upgrade (ISSU)	Yes (StackWise Virtual Link)	Yes (StackWise Virtual Link)[3]
Graceful Insertion and Removal (GIR)	Yes	Yes
MACsec Key Agreement (MKA) high availability	Yes	No[1]
Enterprise security		
Trustworthy solutions	Yes	Yes
Image signing	Yes	Yes
Secure Boot	Yes	Yes
Cisco Trust Anchor Module	Yes	Yes
MACsec encryption (256-bit AES-GCM)	Yes	Yes
Cisco WAN MACsec (256-bit AES-GCM)	No	Yes[2,5]
Object-group ACLs (IPv4/IPv6)	Yes	Yes[4]
Enterprise QoS		
Modular QoS CLI (MQC)	Yes	Yes
Strict priority queuing	Yes	Yes
Class/color-aware queuing	Yes (weighted fair queuing [WFQ])	Yes (virtual output queuing [VoQ])
Policing/metering	Yes	Yes
Shaping/bandwidth	Yes	Yes
Hierarchical QoS	Yes (2-level)	Yes (2-level)

Model	Catalyst 9500	Catalyst 9500X
BGP Ethernet VPN (EVPN) VXLAN		
Fabric spine, leaf, and border support	Yes	Yes[3]
Layer 2/Layer 3 Virtual Network Interface (VNI)	Yes	Yes[3]
Distributed anycast gateway (symmetric integrated routing and bridging [IRB])	Yes	Yes[3]
Centralized gateway (asymmetric IRB)	Yes	No
ESI multihome support	Yes	No
Tenant routed multicast (IPv4/IPv6)	Yes	Yes[3]
Layer 3 border handoff: Multi-VRF, MPLS L3 VPN	Yes	Yes[3]
Layer 2 border handoff: VPLS, EoMPLS L2 VPN	Yes	No[1]
Software-Defined Access (SD-Access)		
Virtual eXtensible LAN (VXLAN)	Yes	Yes
Layer 2 VNI	Yes	Yes
Layer 3 VNI	Yes	Yes
SD-Access control plane	Yes	Yes
SD-Access border	Yes	Yes
SD-Access Layer 2 border	Yes	No
SD-Access edge	Yes	No
Flexible NetFlow (FNF)		
FNF IPv4 flow records	Yes	Yes[2] (software)
FNF IPv6 flow records	Yes	Yes[2] (software)
FNF sampler	Yes	Yes[2]
FNF data export	Yes	Yes[2]
NetFlow version 9 (NFv9) export	Yes	Yes[2]
IPFIX export	Yes	Yes[2]

Model	Catalyst 9500	Catalyst 9500X
Programmability		
NETCONF	Yes	Yes
RESTCONF	Yes	Yes
gNMI/gNOI	Yes	Yes
YANG config models	Yes	Yes
YANG oper models	Yes	Yes
ZTP/PnP	Yes	Yes
Smart operations		
Bluetooth ready	Yes	Yes[2]
RFID tags	Yes	Yes
Blue beacon	Yes	Yes
Out-of-band device management	Yes (RJ-45 and USB-mini type B)	Yes (RJ-45 and USB-C)
Meraki cloud management	Yes	No

[1] Catalyst 9500X models: Feature is not available at FCS, but it is hardware capable.

[2] Catalyst 9500X models: Minimum IOS XE software release 17.8.1 (C9500X-28C8D) and 17.10.1 (C9500X-60L4D).

[3] Catalyst 9500X models: Minimum IOS XE software release 17.10.1 (C9500X-28C8D) and 17.11.1 (C9600X-60L4D). SSO support requires StackWise Virtual for fixed Catalyst 9500 models. ISSU supported on Catalyst 9500X models starting with Release 17.12.1.

[4] Catalyst 9500X models: Object-group ACLs are supported only in the ingress direction.

[5] Need to order HSEC key.

Platform details

Switch models and configurations

All switches ship with the 650W, 950W, 1500W, or 1600W AC power supply as the default.

Figures 1 through 7 show the Cisco Catalyst 9500 Series Switches.

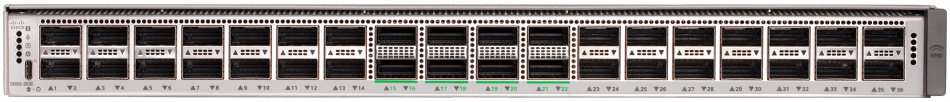

Figure 1. C9500X-28C8D: Cisco Catalyst 9500X switch with 28x 40/100 Gigabit Ethernet QSFP28 ports + 8x 40/100/200/400 Gigabit Ethernet ports

Figure 2. C9500X-60L4D: Cisco Catalyst 9500X switch with 60x 10/25/50 Gigabit Ethernet + 4x 40/100/200/400G Gigabit Ethernet ports

Figure 3. C9500-32C: Cisco Catalyst 9500 Series high-performance switch with 32x 100 Gigabit Ethernet ports

Figure 4. C9500-32QC: Cisco Catalyst 9500 Series high-performance switch with 32x 40 or 16x 100 Gigabit Ethernet ports

Figure 5. C9500-48Y4C: Cisco Catalyst 9500 Series high-performance switch with 48x 1/10/25 Gigabit Ethernet ports + 4x 40/100 Gigabit Ethernet uplink ports

Figure 6. C9500-24Y4C: Cisco Catalyst 9500 Series high-performance switch with 24x 1/10/25 Gigabit Ethernet + 4x 40/100 Gigabit Ethernet uplink ports

Figure 7. C9500-16X: Cisco Catalyst 9500 Series switch with 16x 1/10 Gigabit Ethernet ports

Network modules

The Cisco Catalyst 9500 Series Switches support optional network modules for uplink ports on some of the configurations.

The default switch configuration does not include the network module. When you purchase the switch, you can choose from the network modules described in Tables 4 and 5.

Table 4. Network module numbers and descriptions

Network module	Description
C9500-NM-8X	Cisco Catalyst 9500 Series Network Module 8-port 1/10 Gigabit Ethernet with SFP/SFP+
C9500-NM-2Q	Cisco Catalyst 9500 Series Network Module 2-port 40 Gigabit Ethernet with QSFP+

Table 5. Network module matrix

Model	C9500-NM-8X	C9500-NM-2Q
C9500X-28C8D	No	No

Accessories

The Cisco Catalyst 9500 Series Switches support optional accessories.

The default switch configuration ships with default 19-inch brackets. The accessories mentioned below need to be selected during configuration and ordered separately.

Table 6. Accessories and descriptions

Product number	Description
C9500X-ACCKIT-19I=	Accessory Kit for Cisco Catalyst 9500X Switch - 19” rack mount[1]
C9500X-ACCKIT-23I=	Accessory Kit for Cisco Catalyst 9500X Switch - 23” rack mount[1]
C9500X-4PTH-KIT=	Extension rails and brackets for four-point mounting for Cisco Catalyst 9500X Switch[1]
C9500-ACCKITH-19I=	Accessory Kit for Cisco Catalyst 9500 Series – High-End - 19” rack mount
C9500-ACCKITH-23I=	Accessory Kit for Cisco Catalyst 9500 Series – High-End - 23” rack mount
C9500-4PTH-KIT=	Extension rails and brackets for four-point mounting for Cisco Catalyst 9500 Series – High-End
C9500-ACC-KIT-19I=	Accessory Kit for Cisco Catalyst 9500 Series - 19” rack mount
C9500-ACC-KIT-23I=	Accessory Kit for Cisco Catalyst 9500 Series - 23” rack mount
C9500-4PT-KIT=	Extension rails and brackets for four-point mounting for Cisco Catalyst 9500 Series
C9K-F3-SSD-240GB	Cisco pluggable SSD storage – 240 GB (Catalyst 9500X)[1]
C9K-F3-SSD-480GB	Cisco pluggable SSD storage – 480 GB (Catalyst 9500X)[1]
C9K-F3-SSD-960GB	Cisco pluggable SSD storage – 960 GB (Catalyst 9500X)[1]
C9K-F1-SSD-240G	Cisco pluggable SSD storage – 240 GB
C9K-F1-SSD-480G	Cisco pluggable SSD storage – 480 GB
C9K-F1-SSD-960G	Cisco pluggable SSD storage – 960 GB

[1] Only supported on Catalyst 9500X models.

© 2026 Cisco and/or its affiliates. All rights reserved.

Table 7. Accessory matrix

C9500-32C	Yes	Yes	Yes	No	No	No	Yes	Yes	Yes
C9500-32QC	Yes	Yes	Yes	No	No	No	Yes	Yes	Yes
C9500-48Y4C	Yes	Yes	Yes	No	No	No	Yes	Yes	Yes
C9500-24Y4C	Yes	Yes	Yes	No	No	No	Yes	Yes	Yes
C9500-16X	No	No	No	Yes	Yes	Yes	No	No	No

Catalyst 9500X models have their own accessory kits and SSD storage.

Refer to the Cisco Catalyst 9500X Series Switches Hardware Installation Guide for more information.

For Catalyst 9500 high-performance (C9500-24Y4C, C9500-48Y4C, C9500-32C, C9500-32QC) and 9500X switches, an RFID tag is an optional selection. The RFID tag can be opted out with the selection of C9500-RFID-NONE. The RFID tag can be opted in by selecting C9500-RFID for Catalyst 9500 high-performance (C9500-24Y4C, C9500-48Y4C, C9500-32C, C9500-32QC) switches and C9500X-RFID for Catalyst 9500X switches. UADP 2.0-based C9500-16X will continue to ship with RFID tags.

Note: For Catalyst 9500 high-performance (C9500-24Y4C, C9500-48Y4C, C9500-32C, C9500-32QC) and Catalyst 9500X switches, it is important to make the right selection for RFID opt in or opt out at the time of ordering. An RFID cannot be installed later if it is opted out at the time of ordering.

Power supplies and fan tray

The Cisco Catalyst 9500 Series Switches support dual 1+1 redundant power supplies (AC or DC). The switches ship with one power supply by default. The second power supply can be purchased at the time the switch is ordered or at a later time. If only one power supply is installed, it should always be in power supply bay #1.

The Catalyst 9500 Series ship with up to five field-replaceable variable-speed fans. These have front-to-back airflow and can operate with up to one individual fan failure. The fan trays support fan-tray Online Insertion and Removal (OIR) and can support a maximum fan speed of up to 24,000 rpm.

Catalyst 9500X models ship with six field-replaceable variable-speed fan units. By default these have front-to-back (port-side intake) airflow fan units. The switch also has the option to select six back-to-front (port-side exhaust) airflow fans. The fan trays support fan-tray OIR and can support a maximum fan speed of up to 30,000 rpm.

Note: All Catalyst 9500X fan units must be the same type (either front-to-back or back-to-front). Mix and match of fan trays (front-to-back or back-to-front) is not supported.

Performance numbers for all switch models	C9500-16X	C9500-32C	C9500-32QC	C9500-48Y4C	C9500-24Y4C	C9500X-28C8D	C9500X-60L4D
ASIC	UADP 2.0	UADP 3.0				Q200	
Per-VLAN Spanning Tree (PVST) instances	300[3]	40,00[1]				4,094	
Spanning Tree Protocol (STP) virtual ports (port* VLANs) for PVST	13,000	16,000				16,000	
STP virtual ports (port VLANs) for Multiple Spanning Tree (MST)	13,000	1,000,00[4]				32,000	
Total switched virtual interfaces (SVIs)	1,000	4,000[1]				3800	
Jumbo frames	9,198 bytes	9,216 bytes				9,216 bytes	

[1] Varies based on selected flexible ASIC template and platform.

[2] Line rate for 187-byte packet size and above.

[3] 300 with IOS XE Release 17.1.1 or later. 256 with IOS XE 16.12.x and 16.11.x 128 with IOS XE 16.10.x or earlier.

[4] 100,000 with IOS XE Release 17.5.1 or later. With IOS XE 17.4.1 or earlier: 32,000 with C9500-32C and C9500-32QC; 52,000 with C9500-48Y4C; 28,000 with C9500-24Y4C.

[5] Flexible NetFlow requires IOS XE Release 17.8.1 or later.

[6] Table maximum. The exact percentage of allocation will depend on specific IP/mask combinations.

[7] Table maximum. Shared hardware resource. Maximum ACEs depends on number and type of ACLs configured across various interface types.

Important notes

Directly connected (or host) IP routes mean any /32 or /128 routes, including those that are learned indirectly (clients attached to switch's own VLAN/SVI and those /32 prefixes learned over any routing protocols, such as over OSPF).

Indirectly connected (or advertised) IP routes are subnet routes with a prefix other than /32 or 128 (for example: /8, /16, /24, etc.).

UADP 2.0 based C9500-16X supports 32,000 adjacencies in hardware. So, they can support up to ~32,000 directly attached clients (including all adjacencies) in their own VLAN/SVI.

UADP 3.0 based C9500-32C, 32QC, 24Y4C, and 48Y4C support 80,000 adjacencies for SVI, with Software Database Manager (SDM) template of distribution and 90,000 direct routes for all supported templates when a Layer 3 routed port is used.

In both UADP 3.0 and Silicon One Q200 models, the exact hardware programming (hash efficiency) of IP/mask entries depends on the specific number and type of IP/mask prefixes.

© 2026 Cisco and/or its affiliates. All rights reserved.

Flexible ASIC templates

Cisco Catalyst 9000 switches use flexible Software Database Manager (SDM) ASIC templates to enable universal deployments by leveraging the UADP's ability to create resources to optimize table sizes for different places in the network. Based on how the switch is used in the network, an appropriate SDM ASIC template may be selected to configure the switch for specific features.

Catalyst 9500X models

Cisco Catalyst 9500X models support the following SDM ASIC templates

- Default (core)
- Custom

Table 17 describes the default SDM ASIC template for the Catalyst 9500X models.

Table 17. SDM template descriptions for Catalyst 9500X models

Feature	Default template
MAC addresses	128,000
IP host routes[1]	128,000
IP longest prefix match (LPM) routes[1,2]	2 million
IP multicast routes[1]	32,000
Internet Group Management Protocol (IGMP)/Multicast Listener Discovery (MLD) snooping[1]	16,000
MPLS labels[3]	256,000
Security/object groups	32,000
Security ACLs[1]	8,000
QoS ACLs[1]	8,000
Policy-based routing (PBR)	16,000
Generic Routing Encapsulation (GRE) tunnels	1,024
Sampled NetFlow entries[1]	2 million

[1] IPv4 and IPv6 entries coexist in the same tables, but IPv6 entries require two entries.

[2] LPM entries are stored as a hash, and efficiency is dependent on the actual routes learned. Catalyst 9500X hashing efficiency has been improved in Release 17.12.2.

[3] Per-prefix MPLS labels are limited to 62,000 on Catalyst 9500X models.

© 2026 Cisco and/or its affiliates. All rights reserved.

Catalyst 9500 models

The following SDM ASIC templates are supported on the Cisco Catalyst 9500 Series.

- **Distribution:** Maximizes system resources for MAC and security.
- **Core:** Maximizes system resources for unicast and multicast routing.
- **SD-Access:** Maximizes system resources to support fabric deployment.
- **NAT:** Maximizes system resources for Layer 3 and NAT for support of collapsed-core WAN deployments.

Table 18 describes the standard SDM ASIC templates for the Catalyst 9500 models.

Table 18. SDM template descriptions for Catalyst 9500 models

Template numbers for models C9500-32C, C9500-32QC, C9500-24Y4C, C9500-48Y4C	Distribution template	Core template (default)	NAT template	SD-Access template[2]
IPv4/IPv6 (LPM/host)	114,000	212,000	212,000	212,000
Multicast routes (IPv4/IPv6)	16,000	32,000	32,000	32,000
IGMP/MLD snooping	2,000	2,000	2,000	2,000
MAC addresses	82,000	32,000	32,000	32,000
MPLS/security group tag (SGT) labels	**32,000**	**32,000**	**32,000**	**32,000**
NetFlow/ASIC	**98,000**	**64,000**	**64,000**	**64,000**
Security ACL	270,00[1]	270,00[1]	200,00[1]	270,00[1]
QoS ACL	160,00[1]	160,00[1]	80,00[1]	160,00[1]
PBR/NAT	3,000	3,000	15,500	2,000
Tunnel/MACsec	3,000	3,000	2,000	3,000
LISP	1,000	1,000	1,000	2,000
SPAN	1,000	1,000	1,000	1,000
STP instances	1,000	1,000	1,000	1,000
Control plane policing (CoPP)	1,000	1,000	1,000	1,000
NetFlow ACL	1,000 ingress, 1,000 egress	1,000 ingress, 1,000 egress	1,000 ingress, 1,000 egress	1,000 ingress, 1,000 egress

Custom ASIC templates

Catalyst 9500X models (C9500X-28C8D and C9500X-60L4D)

Beginning with the Cisco IOS XE 17.7.1 release, a custom SDM template allows you to configure several features of the template based on your requirements and not the location of the device in the network.

Table 19. Custom template Forwarding Information Base (FIB) configurable values

Feature	Default value	Scale values (min – max)	Step units
MAC addresses	128,000	32,000[1] to 256,000	1,000
IPv4 host routes	32,000	32,0001 to 256,000	1,000
IPv6 host routes	16,000	16,000[1] to 128,000	1,000
MPLS labels[3]	256,000	0[2] to 512,000	1,000
Security/object groups	32,000	0[2] to 64,000	1,000
Total resources	**608,000**		

[1] Critical features require a minimum allocation to ensure operation. If a custom value is not defined, this value is used.
[2] Some (noncritical) features are allowed to have a 0-entry allocation, to allow increased allocation of other features.
[3] Per-prefix MPLS labels are limited to 62,000 on Catalyst 9500X models.

Learn more about configuring custom SDM templates.

© 2026 Cisco and/or its affiliates. All rights reserved.

C9500-32C, C9500-32QC, C9500-24Y4C, and C9500-48Y4C

Standard SDM templates can be used to configure system resources and optimize support for specific features. However, SDM templates are defined based on how the device is deployed in the network.

Beginning with Cisco IOS XE Release 17.3.1, a custom SDM template will allow you to configure the features of the template based on your requirements and not the location of the device in the network.

Table 20. Custom template configurable FIB values

Feature	Scale values (min – max)	Step units	Default value
MAC addresses	32,000 to 128,000	16,000	32,000
IPv4/IPv6 routes	64,000 to 256,000	16,000	64,000
Multicast routes[1]	0 to 32,000	16,000	16,000
IGMP/MLD snooping[1]	0 to 32,000	16,000	16,000
SGT/MPLS labels[2]	0 to 64,000	32,000	32,000
NetFlow entries – input[3]	0 to 64,000	32,000	32,000
NetFlow entries – output[3]	0 to 64,000	32,000	0
Total resources	**416,000**		

[1] Total Layer 2 and Layer 3 multicast entries may not exceed 48,000.
[2] Each resource holds two SGT + MPLS entries.
[3] NetFlow entries require double entries.

Table 21. Custom template configurable ACL values

Feature	Scale values (min – max)	Step units	Default value
Security ACL - input	4000 to 26,000, 27,000	2000	4000
Security ACL - output	4000 to 26,000, 27,000	2000	4000
QoS ACL - input	1000, 2000 to 16,000	2000	1000
QoS ACL – output	1000, 2000 to 16,000	2000	1000
PBR/NAT	1000, 2000 to 16,000	2000	2000
NetFlow ACL	1000 to 2000	1000	1000
LISP	1000 to 2000	1000	1000
Tunnels	1000 to 2000	1000	1000
Total Resources	**54,000**

Licensing

You have two options for licensing: unified switching licenses or Cisco DNA licenses. The details for each licensing model are as follows.

Unified licensing with the Cisco Networking Subscription

The Cisco Catalyst 9500 Series is eligible for unified licensing through the Cisco Networking Subscription and Cisco Enterprise Agreement.

The Cisco Networking Subscription provides a consistent way to purchase and manage eligible Cisco networking software, hardware support, services, and platform capabilities. It offers customers the flexibility to:

- Align renewal dates with business and budget requirements
- Add licenses to an existing subscription while maintaining a common renewal date
- Upgrade license entitlements during the subscription term or at renewal
- Include both Essentials and Advantage licenses in the same subscription
- Choose cloud-based or on-premises license management and deployment options, where supported

A new Cisco Networking Subscription with switching licenses has a standard minimum term of 36 months.

There are two unified switching license tiers:

- Cisco Switching Essentials
- Cisco Switching Advantage

Both tiers combine device capabilities with subscription-based management and assurance capabilities. The precise capabilities available depend on the license tier, switch platform, software release, and management platform.

Cisco Switching Essentials includes foundational switching, automation, visibility, health monitoring, software-image management, and provisioning capabilities.

Cisco Switching Advantage includes the Essentials capabilities and adds advanced automation, analytics, segmentation, assurance, security, application visibility, and fabric-management capabilities.

For a complete comparison, see the Cisco Switching Licensing Feature Matrix.

Unified licensing support is available for the following releases: 26.2.1, 17.18.5, and 26.1.3.

Cisco DNA licensing

Cisco DNA subscriptions for the Catalyst 9500 Series are offered in Essentials and Advantage tiers with 3-, 5-, or 7-year terms. The Cisco DNA tier must correspond with the applicable Network Essentials or Network Advantage license.

- **Cisco DNA Essentials** provides foundational automation, management, visibility, and assurance capabilities.
- **Cisco DNA Advantage** adds advanced assurance, analytics, policy-based automation, segmentation, and application-visibility capabilities.

As part of the Cisco DNA license, the Catalyst 9500 Series supports the following perpetual network license tiers:

- **Network Essentials**
- **Network Advantage**

Network Essentials provides foundational Layer 2 and Layer 3 switching, automation, visibility, and security capabilities. Network Advantage adds advanced routing, segmentation, multicast, scale, and security capabilities.

Introduction to Smart Licensing

Cisco Smart Licensing is a flexible licensing model that provides you with an easier, faster, and more consistent way to purchase and manage software across the Cisco portfolio and across your organization. And it's secure–you control what users can access. With Smart Licensing you get:

- **Easy activation:** Smart Licensing establishes a pool of software licenses that can be used across the entire organization—no more PAKs (product activation keys).
- **Unified management:** My Cisco Entitlements provides a complete view into all of your Cisco products and services in an easy-to-use portal, so you always know what you have and what you are using.
- **License flexibility:** Your software is not node-locked to your hardware, so you can easily use and transfer licenses as needed.

To use Smart Licensing, you must first set up a Smart Account on Cisco Software Central (software.cisco.com).

For a more detailed overview of Cisco licensing, go to cisco.com/go/licensingguide.

Cisco Catalyst 9500 Series Switches run on Cisco IOS XE Release 16.9.2 or later.

Managing licenses with Smart Accounts

Creating Smart Accounts by using the Cisco Smart Software Manager (SSM) enables you to order devices and licensing packages and also manage your software licenses from a centralized website. You can set up Cisco SSM to receive daily email alerts and to be notified of expiring add-on licenses that you want to renew.

You must order an add-on license in order to purchase a switch. When the license term expires, you can either renew the add-on license to continue using it or deactivate the add-on license and then reload the switch to continue operating with the base license capabilities.

Both the base and add-on licenses are also available for a 90-day evaluation period. An evaluation license is activated temporarily, without purchase. An expired evaluation license cannot be reactivated after reload.

Note: You are not required to deploy Cisco Catalyst Center, just to use one of the above packages.

Specifications

Dimensions, physical specifications, and weight

Catalyst 9500X models

Table 23 lists the dimensions, specifications, weight, and operating temperature for the Cisco Catalyst 9500X models.

Table 23. Catalyst 9500X dimensions, physical specifications, weight, and operating temperature

Description	Specifications	
SKU	C9500X-28C8D	C9500X-60L4D
Dimensions **(H x W x D)**	H = 1.73 in. (4.39 cm) W = 17.5 in. (44.45 cm) D = 21.8 in. (55.37 cm) including fan/tray handles	H = 1.73 in. (4.39 cm) W = 17.5 in. (44.45 cm) D = 21.8 in. (55.37 cm) including fan/tray handles
Rack units (RU)	1 RU	1RU
Chassis with 2 power supplies and built-in fan	29.27 lb (13.28 kg) Weights separated: Chassis = 22.13 lb (10.04 kg) Each fan tray = 0.26 lb (0.12 kg) AC PSU = 2.77 lb (1.26 kg) DC PSU = 2.71 lb (1.23 kg)	28.10 lb (12.75 kg) Weights separated: Chassis = 20.96 lb (9.51 kg) Each fan tray = 0.26 lb (0.12 kg) AC PSU = 2.77 lb (1.26 kg) DC PSU = 2.71 lb (1.23 kg)

Warranty

Cisco Enhanced Limited Lifetime Warranty

The Cisco Catalyst 9500 Series Switches come with an Enhanced Limited Lifetime Warranty (E-LLW) that includes Next-Business-Day (NBD) delivery of replacement hardware where available and 90 days of 8x5 Cisco Technical Assistance Center (TAC) support. Your formal warranty statement, including the warranty applicable to Cisco software, appears in the information packet that accompanies your Cisco product. We encourage you to carefully review the warranty statement shipped with your specific product before use. Cisco reserves the right to refund the purchase price as its exclusive warranty remedy. For further information about warranty terms, visit the Product Warranties page: https://www.cisco.com/go/warranty.

Table 30 provides information about the E-LLW.

Table 30. E-LLW details

	Cisco E-LLW
Devices covered	Applies to Cisco Catalyst 9500 Series Switches.
Warranty duration	As long as the original customer owns the product.
End-of-life policy	In the event of discontinuance of product manufacture, Cisco warranty support is limited to 5 years from the announcement of discontinuance.
Hardware replacement	Cisco or its service center will use commercially reasonable efforts to ship a replacement for NBD delivery, where available. Otherwise, a replacement will be shipped within 10 working days after receipt of the Return Materials Authorization (RMA) request. Actual delivery times might vary depending on customer location.
Effective date	Hardware warranty commences from the date of shipment to customer (and in case of resale by a Cisco reseller, not more than 90 days after original shipment by Cisco).
TAC support	Cisco will provide during business hours, 8 hours per day, 5 days per week, basic configuration, diagnosis, and troubleshooting of device-level problems for up to a 90-day period from the date of shipment of the originally purchased Cisco Catalyst 9500 Series product. This support does not include solution or network-level support beyond the specific device under consideration.
Cisco.com access	Warranty allows guest access only to Cisco.com.

Cisco environmental sustainability

Information about Cisco's environmental sustainability policies and initiatives for our products, solutions, operations, and extended operations or supply chain is provided in the "Environment Sustainability" section of Cisco's Corporate Social Responsibility (CSR) Report.

Reference links to information about key environmental sustainability topics (mentioned in the "Environmental Sustainability" section of the CSR Report) are provided in the following table.

Table 34. Links to sustainability topics

Sustainability topic	Reference
Information on product material content laws and regulations	Materials
Information on electronic waste laws and regulations, including products, batteries, and packaging	WEEE Compliance

Cisco makes the packaging data available for informational purposes only. It may not reflect the most current legal developments, and Cisco does not represent, warrant, or guarantee that it is complete, accurate, or up to date. This information is subject to change without notice.

Cisco Services

Get faster results with expert guidance

Cisco Professional Services provide industry-leading expertise to help you plan, design, implement, and optimize your network. So you can drive better outcomes from the start and get more value – faster.

Cisco Support, powered by Cisco IQ, helps you prevent issues before they happen. You get automated recommendations, early risk detection, and an always-current view of every asset, software version, and configuration across your environment. But we know a list isn't enough. Cisco IQ also instantly analyzes this data and summarizes the most critical observations. So your teams can focus on what matters most.

Explore Cisco Services.

Cisco Capital

Flexible payment solutions to help you achieve your objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. Learn more.

Document history

New or revised topic	Described In	Date
Removed references to C9500-12Q/24Q/40X as the switch models are end of sale	All relevant sections	December 12, 2024
Added Simplified Campus Automation	All relevant sections	June 4, 2024
Added Cisco Catalyst software subscription details and SKUs, updated Cisco Catalyst Center naming	All relevant sections	September 10, 2023
Updated with IOS XE 17.10.1 contents	Entire Document	March 1, 2023
Added Catalyst 9500X-60L4D and updated relevant sections	Entire Document	November 28, 2022
Added new 650W AC power supply	Page 18, 19, 33, 46	September 21, 2022
Added Meraki Cloud Management	Removed Cisco DNA Premier licenses	September 21, 2022
Added Catalyst 9500X-28C8D and Silicon One Q200 details, and updated all sections	Entire document	January 31, 2022
Added Custom ASIC template, eWLC without SD-Access, EVPN, MPLS, Programmability, removed ETA and AVC, updated Operating temperature	Product Overview, Platform Details, Specifications	September 28, 2020
Added NEBS Certification details, 16.11.1 features, VLAN ID correction, SDM template corrections, SVL	Page 12, 14, 15, 22, 23, 24	April 16, 2019
Cisco Catalyst 9500 Series spec change	Updated Page 3	January 11, 2019
Product highlights changes (switching capacity and ports spec changes)	Updated Page 4	January 11, 2019
Cisco Catalyst 9500 Series configurations and port density spec changes	Updated Page 12	January 11, 2019
Performance spec changes	Updated Page 12	January 11, 2019
Text changes to “Important Note”	Updated Page 21	January 11, 2019
Text changes to “Cisco StackWise Virtual”	Updated Page 15	January 11, 2019
Text changes to “Trustworthy systems” and “Cisco StackWise Virtual”	Updated Page 17	January 11, 2019
Added text for Layer 3 Subinterface and BGP EVPN with VXLAN	Updated Page 19	January 11, 2019
Deleted text for “High-performance IP routing” and spec edits to “Minimum software requirements”	Updated Page 22	January 11, 2019
Text changes to “Licensing” and spec edits to “Network Essentials and Advantage Package Features”	Updated Page 23	January 11, 2019

© 2026 Cisco and/or its affiliates. All rights reserved.

New or revised topic	Described In	Date
Text changes to “Cisco DNA Essentials and Advantage Package Features”	Updated Page 24	January 11, 2019
Added product numbers for “Cisco Catalyst 9500 Series”	Updated Page 33	January 11, 2019
Deleted product numbers for “Cisco Catalyst 9500 Series”	Updated Page 34	January 11, 2019
Product highlights changes (switching capacity and ports spec changes)	Updated Page 4	January 11, 2019
Updates to Table 2	Updated Table 2	August 15, 2018
Added clearer description of SKUs, Updated date for Tables 2, 11, 12	Updated SKU descriptions, Table 12 data, Table 11 data, Table 2 Footnotes	July 3, 2018
Added clearer descriptions of host routes and scale adjacency in hardware	Updated Table 11 Footnotes	June 1, 2018
Added Catalyst 9500 high density platforms and updated associated speeds and densities, e.g. Up to 6.4-Tbps switching capacity with up to 2 Bpps of forwarding performance from “3.2 Tbps/1 Bpps” a. 32 port 100G, b. 32 port 40G, c. 48 port 25G. Added Catalyst 9500 mid density platform a. 24 port 25G, b. 16 port 1/10G. Added new optical interfaces - QSFP28, SFP28. Added new power supply options - 650W, 1600W. Added RESCONF support. StackWise Virtual extended to all Catalyst 9500 platforms.	Updated Product Overview	March 31, 2018
AVB support noted for certain platforms. Corrected references to Catalyst 9000 switches, rather than Catalyst 9000 Series switches. Corrected references to Cisco IOS XE, rather than IOS-XE.	Updated Audio Video Bridging	December 15, 2017
